Thank you, Chris.
Your work is vital, and you do it very well.
Hope to see you soon,
Craig

Dear Louis and Craig with a cc to Ken,

Many thanks for your public comments yesterday regarding NOAA's press release about the Birmingham WFO. As someone in the midst of the controversy here at NHC, it's been frustrating not being allowed to weigh in publicly about what's been done and said. I very much appreciate you both standing up for scientific integrity within NOAA and supporting our mission to keep people safe.

Sincerely,
Chris

"The eyewall itself can be seen...nearly touching the sea surface...
The pancake-shaped white patches are places where the wind is
literally scooping water from the sea...This is a place of
unmitigated violence, where bubble-filled water gradually gives
way to spray- and cloud-filled air, with no definite interface that
one could call the ocean surface. It is arguably the worst place
in the world for a ship."
