Dear Ms. Roberts,

I am just writing to let you know how incredibly disappointed I am in the NOAA chastisement of the weather service in Alabama. Instead of a public rebuke you could have simply spoken to them in private or internally to not comment on presidential tweets.

Instead, you choose a public rebuke which did incredible damage to the reputation of your organization. It also caused further damage to our president who is already seen as an ego driven leader. You lost sight of your purpose and mission as an organization. In short, it was a disservice to all.

If you care about the organization, you need to find ways to repair the damage and not let things stand as they are. If you don't care, you might as well start attempting to change the weather as the president directs you to do so.

Regards,

dave nasralla
